Pharmacy & Research, payable at
Surendranagar.

Date: _____ Signature: _____

Objective

Six sigma helps to have a good idea of very fundamental details about the quality control methodology. Six Sigma is a highly disciplined, structured, rigorous approach for process improvement that helps to focus on developing and delivering nearly perfect products and services. Sigma is a statistical term that measures how far a given process deviates from perfection. Six Sigma measures how many "defects" are in a process then systematically figure out how to eliminate them and get 3.4 defects per million opportunity as close to "zero defects" as possible. To achieve Six Sigma quality, a process must produce not more than 3.4 defects per million. The continual statistical measuring, controlling and analyzing of each and every process throughout every Six Sigma Project have the propensity to lead to quality improvement.

Eligibility for Registration

B.Pharm/B.E./B.Sc/M.B.A/M.C.A

Registration Details

Registration fee: 300 INR

Mode of Payment: DD /Cash

Note: Photocopy of the registration form is permissible.
